

## IN THE CLAIMS

Please amend claim 32 as follows:

1-31. (CANCELLED)

32. (CURRENTLY AMENDED) A method of attracting T lymphocyte or mature host dendritic cells to a site of a spontaneous syngeneic tumor in a mammal comprising the steps of:

- (a) obtaining dendritic cells from the mammal;
- (b) introducing an exogenous polynucleotide encoding a secondary lymphoid tissue chemokine comprising the amino acid sequence of SEQ ID NO: 2 as shown in SEQ ID NO: 1 into the dendritic cells so that the cells express the secondary lymphoid tissue chemokine; and
- (c) placing dendritic cells generated in step (b) at the site of the syngeneic tumor in the mammal;

wherein the secondary lymphoid tissue chemokine expressed by the dendritic cells generated in step (b) attracts T lymphocyte or mature host dendritic cells to the site of the syngeneic tumor in the mammal.
